1. At a Glance: Currency Pairs & Time Horizons

You'll see one signal per pair—EURUSD, GBPUSD and XAUUSD (Gold)—each based on three horizons:

- Short-Term
- Medium-Term
- Long-Term

2. How Big Is "Short," "Medium" and "Long"?

Horizon	EURUSD & XAUUSD	GBPUSD
Short	±0.6%	$\pm 0.8\%$
Medium	±1.0%	±1.2%
Long	±1.4%	±1.6%

3. Signal Anatomy

Every hourly update looks like this:

TeconLab AI 'XAUUSD' Long-Term Forecast [473.50 PIPS]

Datetime: 2025-05-06 10:00:00 GMT

Entry Point: 3382.13

Forecast Outcome:

1 Long

Probability: 98.00% Take Profit: 3429.48

Stop Loss: 3334.78

Holding Long position (strong)

Financial Engineering

- Forecast Outcome shows direction & icon.
- **Probability**, **Take Profit**, **Stop Loss** are your exact levels.
- **Comparison of Solution :** Don't skip the very last line—the comment (e.g. " Holding Long...") tells you how all three horizons line up. Always read that before you trade.

4. When All Three Agree ("Strong" Signal)

If you see " Holding ... (strong)", it means short, medium and long all point the same way. **Action:** enter or hold that position until take-profit or stop-loss is reached.

5. When They Don't All Agree ("Caution" Signal)

Example comment:

"A Holding Short has a possibility of rise (drop)... Closing Short (Long) position is better..." That tells you the **long-term trend** conflicts with the medium or short term. Action:

- If you're in the trade, close it or move your stop to break even.
- If you're flat, wait for the next clear "strong" signal.

6. Your Hourly Routine

- 1. Check the latest signal for each pair.
- 2. Always read the comment under that signal—it's your quick status check.
- 3. **Decide**: strong = enter/hold; mixed = exit or stand by.
- 4. Set stop-loss & take-profit exactly as shown.
- 5. Repeat every hour to stay in sync with market shifts.

7. Keep It Simple

- One clear strong signal is enough, don't overtrade.
- Respect your stop-loss.
- Use that comment line as your shortcut: whenever it changes, reassess.

Follow this, and you'll never miss the key insight hidden in each signal's comment. Good trading!
