

TeconLab Mentor AI Platform Guidebook

Getting Started with TeconLab Mentor AI Platform V2 (Windows)

To download and start using the **TeconLab Mentor AI Platform V2**, please follow the steps below:

1. Create Your Account

To access the platform, you'll first need to register on our website:

 <https://teconlab.com/register/>

Account approval typically takes **less than 24 hours**.

2. Log In

Once your account is approved, log in here:

 <https://teconlab.com/my-account/>

3. Download the Platform

After logging in, go to the Downloads page:

 <https://teconlab.com/Downloads/>

From there, download **TeconLab AI Mentor Platform V2 (Windows)**.

4. Request Your API Key

To activate the software, you'll need an **API key**. This key acts as your password to connect the platform with our servers and receive AI-generated trading signals.

Apply for your API key here:

 <https://teconlab.com/waitlist/>

Make sure to select **“TeconLab Mentor AI Platform”** as the product when filling out the form.

5. Start Using the Platform

Once approved, the TeconLab team will send you your API key. The key will be **active and free to use for 30 days**.

Platform Overview & User Interface Guide

The **TeconLab AI Mentor Platform** is designed to deliver real-time, AI-powered trading signals for **XAUUSD (Gold)**, **EURUSD**, and **GBPUSD**. It uses advanced predictive models to generate hourly signals across **Short-Term**, **Medium-Term**, and **Long-Term** timeframes. The system presents this data in a clean visual format to help you quickly understand and act on trading opportunities.

Image 1: API Key Login Screen

Before you can use the platform, you'll need to enter your **API Key** on the login screen. This key connects your software to the live TeconLab server so you can receive signals.

Where to get your API key:

You must request your key from our waitlist page here:

 <https://teconlab.com/waitlist/>

Once approved, your API key will be sent to your registered email, and it will be free to use for the first **30 days**.

Image 2: Signal Dashboard & Analysis

After logging in, you'll see the main dashboard. Here's a breakdown of what each section includes:

1. Symbol Tabs (Top Section)

You can choose from **EURUSD**, **XAUUSD**, and **GBPUSD** by clicking the respective tabs at the top. The system will display signals and charts for the selected currency pair.

2. Confidence Bars

Each timeframe (Short-Term, Medium-Term, Long-Term) includes a colored bar indicating **model confidence**. A higher percentage shows stronger agreement among AI agents.

3. Signal Table

This table summarizes:

- **Term** (Timeframe: Short, Medium, Long)
- **Signal** (Buy/Long or Sell/Short)
- **Timing** (in GMT and Local time)
- **Entry Point**
- **Take Profit (TP)** and **Stop Loss (SL)** levels

4. Candlestick Chart + TP Markers

This chart displays recent price action and projected Take Profit levels using colored dots:

-  Long-Term TP
-  Medium-Term TP
-  Short-Term TP

Dashed lines show expected movement based on AI analysis.

5. AI Description Panel

On the right side, you'll find a detailed summary of the current market analysis written by the AI system. It includes:

- **Market sentiment**
- **Buy zones and targets**
- **Stop-loss levels**

TeconLab Mentor AI Platform Guidebook

- Support and resistance levels
- Economic conditions

This helps users understand not just what to do, but why the AI suggests it.
